

## ISASD 2024 Workshop Proposal Form

The workshops will be held from July 8th to July 11th, 2023. Please provide the following information, which will be reviewed by the ISASD 2024 committee.

1. Workshop Title:

Research on the supply and application of public education resources in the context of education digitalization

2. Workshop Chairs:

Name	Liu Hehai
Affiliation	Anhui Normal University
E-mail	liuhehai@mail.ahnu.edu.cn

3. Workshop Chair's Introduction (please provide a 150-word introduction):

Liu Hehai, Ph.D., Nanjing Normal University, Professor, College of Educational Sciences, Anhui Normal University. He is a Senior Visiting Scholar at the Taiwan Central University, and Chairman of the International Conference on Cognitive Learning (IC3) China Conference. He is the deputy director of the Higher Education Professional Committee of the Anhui Association of Educational Technology, the permanent director of the Information Technology Professional Committee of the China Association of Educational Technology, the executive principal of Changfeng Xiaitang Experimental School affiliated with Anhui Normal University (take a temporary position), and serves as a research expert on educational informatization and education science planning in Anhui Province.

He has published more than 20 CSSCI (SSCI/SCI) papers, 3 monographs and 3 textbooks. The main research fields are educational informationization and digital learning, media literacy and visual culture, information technology and subject integration.

4. Statement of Objectives (200-500 words):

In the process of education digitization transformation, platform-based learning has become a vital part of life-long learning. To build a learning society in which “Everyone can learn anywhere at any time”, the

construction of resources has become a key factor. However, government-led resource platforms and “Mooc” websites have not reached an ideal state of continuous learning. The platform “Bilibili” website based on “demand-oriented” has become the upsurge of youth group learning, therefore, investigating the construction and operation mechanism of public resources such as the “Bilibili” website will promote the transformation and upgrading of education digitization and better serve the development of high-quality education. In summary, on the one hand, our team is to focus on the construction and operation of public resources, and on the other hand, we will systematically explore the paths and strategies of young people's public resources use.

5. Target Article Quantity and Expected Number of Participants:

The target article quantity is 10 and the expected number of participants is 8.

6. Expected Technical Program Committee Members:

The members are Liu Hehai, Zhao Li, Wu Wentao, Bai Qian, Suntian Linzi, and Zhou Jin
